# Rocket.Chat Al: Selfhosted Al for privacyconscious organizations

Meet your on-premise ChatGPT — secure, accurate and fully in your control.

Sovereign AI — built for organizations that prioritize data sovereignty.

We help regulated industries implement an on-premise AI solution that can be securely enriched with proprietary information without compromising data security and privacy.

Is this your organization today?

organizations banned the use of GenAl over privacy and data security risks.

of regulated industries refrain from using GenAl tools due to concerns over quality of output.

### David Miller 9:12 AM

You're welcome, Alice. Stay safe, and don't hesitate to reach out if you need further assistance.

### 

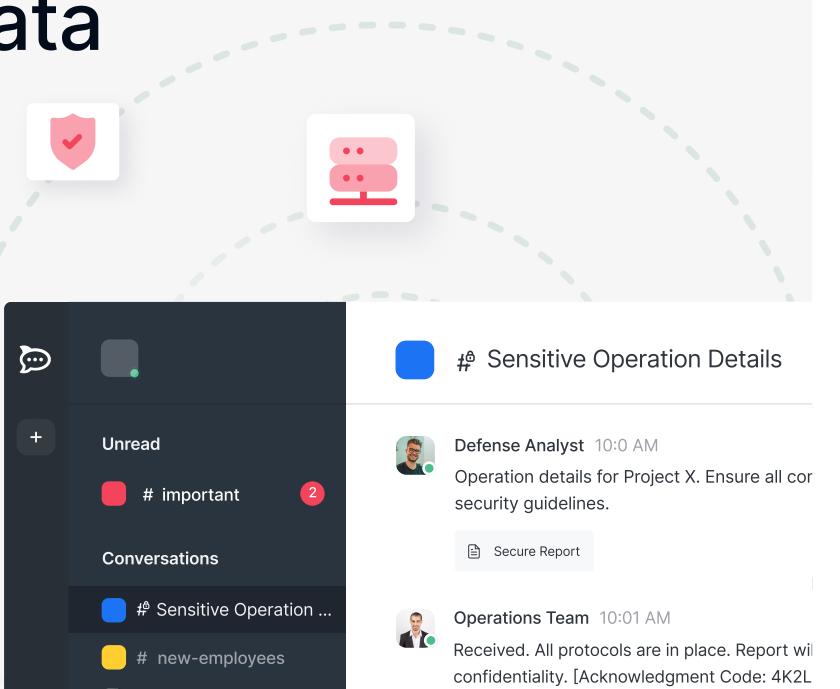

Rocket.Chat AI 9:13 AM

Alice Rivera inquired about emergency housing and financial assistance following flood damage to her home. Provided steps for temporary housing application. Explained the financial relief process and required documents with a 30day deadline. Next steps: Alice to submit documents and application, with case review within 48 hours.

# Why choose Rocket.Chat AI?

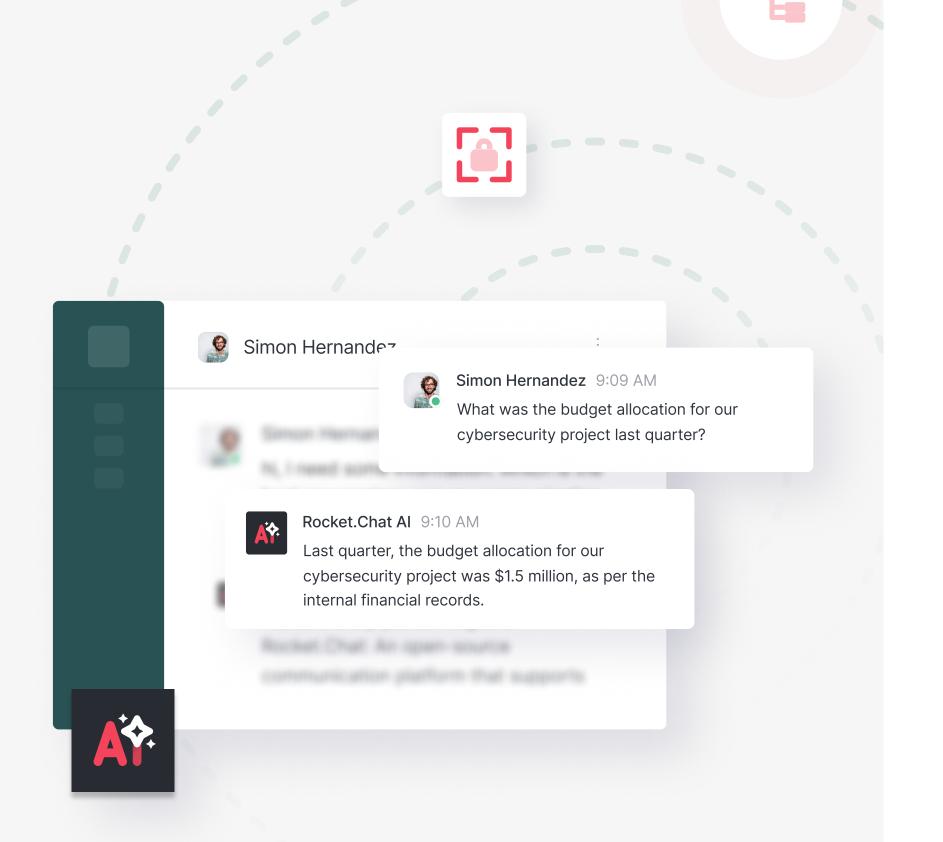

## **Complete control and ownership** over proprietary data

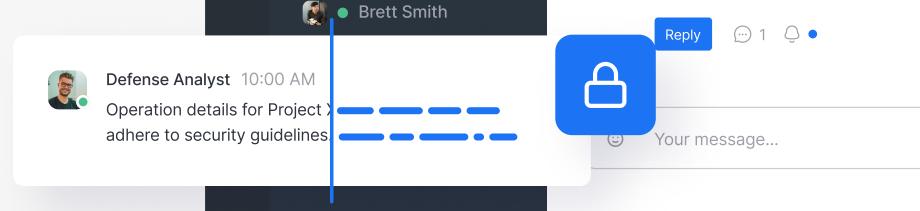

Deploy a self-hosted Large Language Model (LLM) to retain full control and ownership over the usage and management of your proprietary data, comply with data protection laws and protect your intellectual assets.

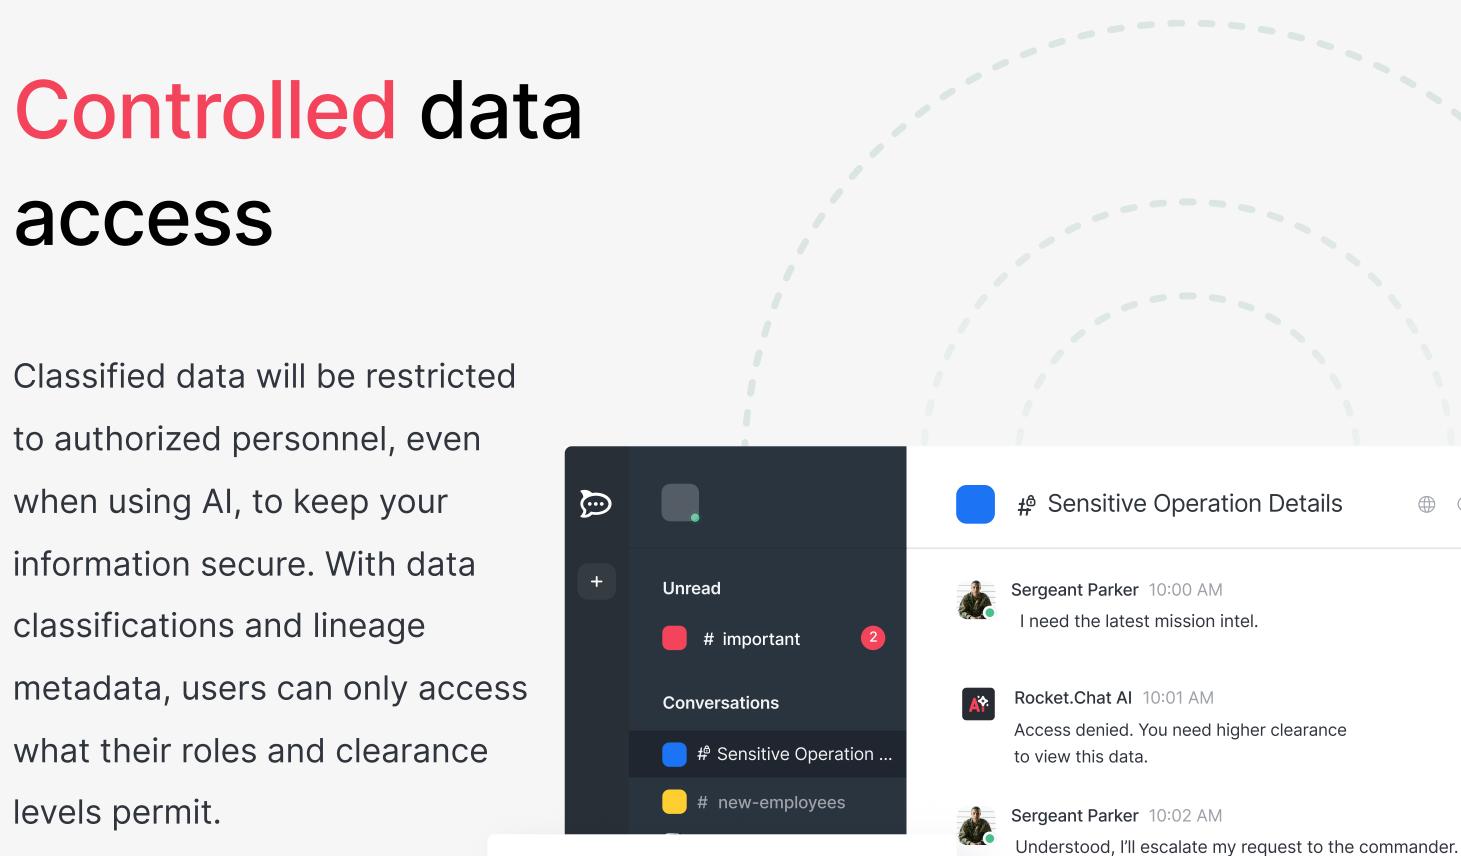

## Enhanced data accuracy with in-house intelligence

Ensure greater information accuracy by using a Retrieval Augmented Generation (RAG) pipeline to augment LLM with in-house intelligence and generate contextually appropriate responses — without the concern of unwarranted data exposure.

Your message.

Access denied. You need higher clearance

to view this data.

## Model-agnostic solution to avoid vendor lock-ins

Greater flexibility in choosing an LLM or Retrieval Augmented Generation (RAG) pipeline that's best suited to your organizational needs to avoid vendor lock-in, save costs, and improve the reliability of the systems.

# Rocket.Chat Al is available as an Add-on for Enterprise users.
