

Mission-critical communication for air-gapped environments

Used across the DoD up to IL6

Leading Federal System Integrators & Federal Contractors rely on Rocket.Chat for secure, air-gapped collaboration on program work and to deploy within their DoD customers' environments. Used for training and simulation, cross-agency collaboration, and daily communications, it enables mission-critical interactions for teams, warfighters, and mission partners.

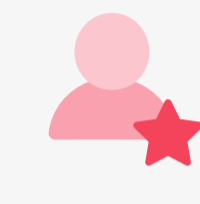

Secure & resilient mission communication

Real-time chat, video and whiteboarding interactions, ensuring reliable and resilient tactical and defense operations in contested and isolated environments

Classified & unclassified data segmentation

Secure multi-level clearance communications within a single platform, ensuring information integrity and confidentiality.

Zero trust & role-based access

Granular access controls, MFA, and SSO ensure secure access, while audit logs, monitoring, and threat detection enhance compliance.

AI that puts you in control

Accelerated operations with full data autonomy—self-host an LLM for classified control and enrich it with in-house knowledge via RAG pipeline.

Flexibility and customization

Use pre-built components to create custom apps and integrations tailored to your unique needs and workflows.

Supply chain & vendor coordination

Interoperable for controlled and compliant communication with third-party contractors, vendors, and partners.

What's in it for Federal System Integrators?

- ✓ Offer a scalable, secure communications solution tailored for federal agencies.
- ✓ Differentiate from competitors with a compliant, air-gapped, and mission-ready platform.
- ✓ Streamline collaboration across classified and unclassified projects.
- ✓ Work with a proven, security-focused technology provider committed to federal and defense success.
- ✓ Customize the platform to meet your team's and mission-specific requirements.

Ensure mission success with Rocket.Chat

Training and professional services for seamless integration | 24/7 mission support | Trusted partnership
